Experience

Freelance Frontend Developer Jan 2025 – Present
Self-Employed *Remote, Egypt*

- Built responsive client web apps with React.js, Tailwind CSS, Bootstrap, and Firebase; integrated REST APIs (OpenWeatherMap, IPGeolocation).
- Implemented secure authentication with Firebase Authentication and role-based access control for admin dashboards.
- Optimized image delivery with Cloudinary, lazy loading, and responsive images.
- Gathered requirements and delivered projects on agreed timelines in a remote setting; used Git/GitHub and Vercel for version control and deployment.

Projects

JinStore – E-Commerce Platform (Frontend Developer, Team of 5, DEPI Project) 2025
React 19, Vite, React Router, Tailwind CSS, Axios, REST APIs

- Built the entire frontend of a MERN e-commerce platform: product browsing, cart, checkout and orders, authentication, and vendor dashboard.
- Integrated the team's REST API with Axios, handling JWT authentication, protected routes, and role-based views (user, vendor, admin).
- Managed state with Context API; built reusable components and a responsive Tailwind CSS UI.
- Worked with four teammates (Node/Express/MongoDB backend) via Git and GitHub; deployed on Vercel.
- GitHub: github.com/Omar-Kamall/finall-project-depi | Live: finall-project-depi.vercel.app

Sunrise Hotels – Hotel Booking Platform Jan 2025
React.js, Firebase, Cloudinary, Tailwind CSS

- Developed a hotel booking platform where users browse hotel units and connect via WhatsApp to book.
- Implemented CRUD with Firebase Realtime Database and a secure admin dashboard using Firebase Authentication and role-based permissions.
- Used Cloudinary for image hosting, code splitting, and lazy loading; designed a responsive Tailwind CSS UI for all devices.
